## Preston Emergency Service

Preston Ambulance is currently seeking applicants that are willing to take the EMT class and volunteer for Preston Emergency Service for a minimum of one year. EMT's and First Responders are compensated for responding to calls and are eligible for other benefits. All training required equipment and uniforms are provided at no cost.

Preston Emergency Service is one of our community's most active volunteer organizations and plays a vital role in providing emergency medical care in the pre-hospital setting. We work closely with area fire departments, law enforcement agencies, Air Ambulance, and other area ambulance services to serve the citizens of Preston, Fountain, Lanesboro, Whalan and surrounding townships with quality pre-hospital care. The skills learned by becoming an EMT can be used both on and off the job and can also provide a starting point to move on to other medical related fields such as paramedic, RN, and MD.

As a basic life support ambulance service, we strive to be a leader in high quality care with the leading technology. We were the first in SE MN to offer Lucas mechanical CPR device and implemented IV intervention along with 12-Lead cardiac monitoring for recognizing STEMI patients in the field.

If you would like to be considered as a member of our team, please complete an application form, and return it to Deb Ristau at [dristau@prestonmn.org](mailto:dristau@prestonmn.org).
